Lifecycle marketing

# Clay for **Data Foundation**

## PROBLEM

Fragmented enrichment tools created conflicting CRM data with no single source of truth.

**Mark Lail**

Director of Revenue  
Operations  
Vanta

## SOLUTION

Pull contact data from multiple enrichment providers

Waterfall logic selects most reliable data points

Unified enrichment output tailored per CRM record

Sync enriched contacts into Salesforce CRM

## IMPACT

**80%+**

enrichment coverage achieved

**1,000+**

new enriched contacts added per month

**100%**

automated research tasks across all sales reps

## PROBLEM

An 8-million-record database across 35 verticals lacked enrichment to target effectively.

**Sharon Roessen**

Chief Operating Officer  
Terrapinn

## SOLUTION

Clay enriches 8M records with firmographic signals

Classify records against ICPs across 35 verticals

Tailor campaigns using enriched industry-specific context

Push enriched records into Salesforce

## IMPACT

**+28%**

email open rate lift

**+35%**

more emails sent

**21.5M**

more email opens  
year-over-year

SPARK SOMETHING  
**TERRAPINN** 

## PROBLEM

Fragmented data tools couldn't enrich millions of prospect records across multiple countries.

**Pedro Azevedo**

Marketing and Growth  
Operations leader  
Coverflex

## SOLUTION

Clay enriches 1M+ prospects from LinkedIn and APIs

Identifies decision-makers and routes by signal strength

Appends emails, LinkedIn posts, and job changes per contact

Push enriched, signal-qualified leads into HubSpot

## IMPACT

**3M+**

companies scanned monthly for buying signals

**1M+**

prospects dynamically enriched

**200+**

additional demos per month

## PROBLEM

Scattered data across multiple tools prevented maintaining a unified, enriched CRM.

**Petra Hajal**

Marketing Operations  
Oyster

## SOLUTION

Enrich accounts and contacts with firmographic data

Score ICP fit and map to CRM records

Append decision-maker contacts and intent signals per account

Sync enriched records back to CRM

## IMPACT

**40 hrs**

Saved monthly per sales rep

**4x**

increase in accounts reached

**Oyster**

## PROBLEM

CRM held only email addresses with no firmographic data to segment their audience.

**Dan Murphy**

COO

Exit Five

## SOLUTION

Import 27K contacts from HubSpot into Clay

Classify contacts and route to matching enrichment providers

Append job title, company size, revenue per contact

Push enriched firmographic records back to HubSpot

## IMPACT

**100%**

automation of geographic targeting for events

**2x**

increase in sponsorship deal velocity

**exit five**

## PROBLEM

Single-vendor data gaps leave global firmographic records incomplete across 100+ countries.

**Joel Davidson**

VP of Revenue  
Operations  
Mistral AI

## SOLUTION

Query 10+ firmographic providers per account

AI standardizes and fills revenue gaps automatically

Estimated revenue drives segmentation, routing, scoring

Sync enriched records into Salesforce

## IMPACT

**10+**

data providers waterfalled

**25,000+**

accounts enriched with firmographic data

**5**

data points combined by AI to create unique data point

**Mistral AI**

## PROBLEM

Fragmented European data vendors made multi-country account enrichment painfully slow.

**Cody Leovic**

Senior Growth Manager,  
EMEA  
Verkada

## SOLUTION

Waterfall queries 150+ regional data sources

Validates results across multiple regional providers

Enriches accounts with country-specific verified data

Push enriched records to Salesforce per campaign

## IMPACT

**62%**

better enrichment rate vs. large incumbent vendor

**95%+**

accurate email validation results

**80%+**

data coverage increase across niche geographies

**Verkada**

## PROBLEM

Siloed data across tools left reps without account context for thousands of use cases.

**Tim Bourcier**

RevOps, Marketing Lead  
Merge

## SOLUTION

Enrich 50,000+ accounts using multiple data sources

Classify each account by industry and use case

Tailored offering based on relevant use case

Push enriched fields back into Salesforce

## IMPACT

**20%**

improvement in response rates on enriched accounts

**10+ hrs**

saved weekly per rep

**50,000+**

accounts enriched and categorized in Salesforce

 **MERGE**

## PROBLEM

Traditional enrichment vendors lack custom data dimensions needed for technical enterprise deals.

**Bryanna Clancy**

Marketing Ops & GTM  
Engineering Leader  
Hex

## SOLUTION

AI agents enrich 50,000+ contacts across custom dimensions

Score data maturity, AI capabilities, and tech stack

Map buying groups and decision-makers per account

Push enriched profiles into Salesforce

## IMPACT

**88%**

data gap filled vs. previous enrichment vendor

**50,000+**

contacts enriched through waterfall

**HEX**

## PROBLEM

Manual prospect enrichment required external contractors, hours of deduplication, and still produced inaccurate CRM data.

**Davide Grieco**

Head of Growth  
Verkada

## SOLUTION

Auto-enrich prospects with LinkedIn profiles, addresses, domains

Deduplicate and validate enriched fields across sources

Match each contact to verified local address

Sync enriched records to Salesforce

## IMPACT

**100%**

elimination of manual enrichment tasks

**20 hrs**

time saved per week

**Verkada**

## PROBLEM

Lead and account records decayed rapidly, making manual data updates unsustainable for SDR workflows.

**Darri Atlason**

Head of Growth  
Harmonic

## SOLUTION

Clay auto-enriches contacts tracking job changes

Route enriched leads by territory and account ownership

Tailor outreach using recent signals

Push updated records to CRM and sequences

## IMPACT

**50 hrs/mo**

of manual enrichment work eliminated

**3x**

response rate

**2x**

SDR outbound capacity

## PROBLEM

Sales reps lacked on-demand contact enrichment and automated job change tracking inside their CRM.

**Andrew Thomas**

Director of Marketing  
Regency Supply

## SOLUTION

Webhook pulls contacts and matches LinkedIn profile

Predefined criteria triggers firmographic enrichment

Reps receive tailored summaries per contact

Push enriched data and job alerts to HubSpot

## IMPACT

**5,000+**

key contacts continuously monitored for job changes

**100%**

self-serve enrichment

**0**

manual steps required

**REGENCY**SUPPLY

## PROBLEM

Sellers lacked multi-source enrichment natively within their CRM workflow.

**Keith Jones**

GTM Systems Lead  
OpenAI

## SOLUTION

Multi-source waterfall enrichment on individual CRM records

Route enrichment requests across multiple data providers

Deliver curated lead batches tailored per account

Push enriched records back into Salesforce

## IMPACT

**150/day**

lead enrichments per rep per

## PROBLEM

Standard enrichment tools lacked precision to identify niche ICP signals.

**Alexander DeMoulin**

Director of GTM Ops  
Intercom

## SOLUTION

Enrich CRM records via 150+ providers

Test niche attributes correlated with strong product adoption

Surface raw qualifying signals per account for reps

Push enriched ICP data into Salesforce

## IMPACT

**150+**

data providers used to enrich CRM records

**Thousands**

of CRM records enriched with niche ICP attributes

**INTERCOM**

## PROBLEM

Manual data work blocked accurate, large-scale lead enrichment across the growth team.

**Davison Chung**

Growth Lead  
Rippling

## SOLUTION

Import leads into Clay tables automatically

Enrich with firmographic and contact data providers

Tag leads with persona-specific enriched attributes

Store in Snowflake and sync to Salesforce

## IMPACT

**2x**

cold email performance lift

**30**

person growth team enabled to self-serve enrichment

**100%**

automation of enrichment workflows

**}} RIPPLING**

## PROBLEM

Rapid team growth left 150,000 CRM accounts with unreliable firmographics that reps didn't trust.

**Fredrika Hillström**

GTM Operations Manager  
Sana

## SOLUTION

Waterfall-enrich 150,000 Salesforce accounts across multiple sources

Standardize firmographics, deduplicate, apply conditional enrichment rules

Surface custom fields like L&D team size per account

Push corrected records back into Salesforce

## IMPACT

**+60%**

lift in CRM accuracy across 150,000 accounts

**85,000**

Salesforce accounts enriched with core data

**30,000**

accounts enriched with custom parameters

**Sana**<sup>TM</sup>

## PROBLEM

Salesforce lacked industry, headcount, and location data for precise targeting.

**Francesca Pavan**

Director of Demand  
Generation  
Legora

## SOLUTION

Enrich Salesforce records with firmographic data points

Classify firms by industry, archetype, and size

Tag each account with attorney count and location

Push enriched records back into Salesforce via integration

## IMPACT

**90%**

contact match rate on enriched audiences

**+70%**

faster pipeline-generating campaign launches

**700+**

law firms and legal teams mapped globally

**LEGORA**

## PROBLEM

CRM data decayed faster than manual teams could enrich, breaking downstream scoring and routing.

**Raman Khanna**

Growth

ElevenLabs

## SOLUTION

Waterfall-enrich firmographic and contact fields across multiple providers

Classify each account against refreshed ICP definitions

Tag industry, size, seniority, and department per record

Write enriched records back to Salesforce automatically

## IMPACT

**1,000s**

of accounts reclassified without manual rework

**+50%**

lift in SQLs enabled by enrichment-powered scoring

**4x**

demand gen SQLs from scoring built on enriched data

**ElevenLabs**

## PROBLEM

Audience data was a black box, making sponsorship pitches rely on guesswork.

**Dan Murphy**

COO

Exit Five

## SOLUTION

Enrich 27,000 contacts with firmographic data

Segment audience by revenue tier and seniority

Tailor sponsorship pitches using audience data

Present data-backed insights to sponsors

## IMPACT

**2x**

increase in sponsorship deal velocity

**13,000+**

contacts matching ICP identified

**exit five**

## PROBLEM

New reps spent 90 days on manual account research before reaching full productivity.

**Stuart Lundberg**

Head of Operations  
Pump

## SOLUTION

Enrich accounts via 150+ data sources automatically

Match companies to codified ICP tech-stack criteria

Build territory lists with contacts and context

Deliver pre-built lists to each new rep

## IMPACT

**6x**

faster rep ramp time

**25%**

more revenue per rep

**30+**

sales reps onboarded with pre-built territory lists

## PROBLEM

Manual prospect research took too long, capping SDR output and revenue potential.

**Austin Sandmeyer**

Head of Growth Marketing  
Sendoso

## SOLUTION

Import 500+ target contacts from CRM into Clay

Enrich with LinkedIn activity, posts, and job changes

Generated tailored gift and email messaging

Trigger personalized gift sends via Sendoso SmartSend

## IMPACT

**14**

opportunities booked in first week

**10x**

outbound productivity

**500+**

target accounts continuously scanned

**Sendoso**

## PROBLEM

Manual seller research across web and earnings reports cannot scale across territories.

**Keith Jones**

GTM Systems Lead  
OpenAI

## SOLUTION

AI agent scrapes websites, LinkedIn, and earnings reports

GPT models summarize latest 90-day account developments

Structured insights tailored per target account context

Deliver research briefs to sellers in CRM

## IMPACT

**100%**

automated research tasks

**90 days**

of account context surfaced automatically to reps

## PROBLEM

Multi-step CRM data handoffs took 48 hours, blocking ops teams from strategic work.

**Arthur Lorente**

Director of GTM Operations  
A-LIGN

## SOLUTION

Ingest data requests and CRM records into Clay

Process, clean, and transform data without admin tickets

Enable non-technical staff to manipulate CRM data directly

Push verified data directly to Salesforce

## IMPACT

**24x**

faster data operations, from 48 hours to 2 hours per cycle

**46 hours**

saved weekly by eliminating multi-step admin handoffs

**A-LIGN**

## PROBLEM

Growth team couldn't rapidly test new ideas without engineering resources or new data providers.

**Davison Chung**

Growth Lead  
Rippling

## SOLUTION

Enrich leads and addresses via multi-source providers

Route experiments to self-serve Clay workflows

Test new copy and personalization per variant

Push updates into email and direct mail systems

## IMPACT

**30 person**

growth team enabled to self-serve experiments without engineering

**<1 day**

to test new growth ideas via self-serve Clay workflows

**}} RIPPLING**

# Clay for **Prospecting**

## PROBLEM

Sourcing sponsors, exhibitors, and speakers for 90+ events took months to do manually.

**Sharon Roessen**

Chief Operating Officer  
Terrapinn

## SOLUTION

AI scans signals across 35 verticals' prospects

Classify prospects as sponsors, exhibitors, or speakers

Enrich each prospect with vertical-specific context

Hand enriched lists to 150 sales reps

## IMPACT

**90%**

reduction in prospect acquisition cost

**10 minutes**

to build lists that previously took two months

**+19%**

increase in revenue per sales rep

SPARK SOMETHING  
**TERRAPINN** 

## PROBLEM

Traditional B2B data providers cannot reliably source local service contractor contact details.

**Andrew Thomas**

Director of Marketing  
Regency Supply

## SOLUTION

Pull contractor listings from Google Maps by region

Filter and verify contacts against active business listings

Match verified phone numbers to local contractor profiles

Deliver phone-verified contact lists to sales reps

## IMPACT

**100%**

phone-verified contractor data via Google Maps

**0**

contractors previously findable via ZoomInfo or Apollo

**REGENCY**SUPPLY

## PROBLEM

Mapping a global TAM across 100+ countries manually takes many months.

**Joel Davidson**

VP of Revenue  
Operations  
Mistral AI

## SOLUTION

Source 25,000+ accounts  
via Find Companies globally

Deduplicate, segment by  
region and industry

Score and prioritize  
accounts per territory

Sync enriched accounts  
into Salesforce

## IMPACT

**2 weeks**

to map global TAM (vs. 2 months)

**25,000+**

enriched accounts sourced  
globally

**100+**

countries covered with  
equitable territories

**Mistral AI**

## PROBLEM

Manual TAM list-building took days, blocking timely outbound for a new product.

**Alexander DeMoulin**

Director of GTM Ops  
Intercom

## SOLUTION

Continuous flows enrich 4,000+ accounts across five signal types

Score and filter accounts by Fin-fit signals live

Surface raw qualifying signals per account for reps

Push enriched lists to sales reps via Salesforce

## IMPACT

**4,000+**

accounts sourced in a single month

**21,000**

contacts enriched in a single month

**Minutes**

to build net-new prospecting list

**INTERCOM**

## PROBLEM

Fifty new reps needed ICP-fit accounts, but every Salesforce record was already assigned.

**Fredrika Hillström**

GTM Operations Manager  
Sana

## SOLUTION

Upload top-performing accounts into Clay for lookalike search

Exclude existing CRM records and score ICP fit

Match thousands of net-new companies to each rep's book

Divide into 50 books and push to Salesforce

## IMPACT

**+20%**

addressable market expansion from Clay-sourced accounts

**50**

new rep books of business sourced in a single day

**1 day**

to complete work that previously took weeks

**Sana**<sup>TM</sup>

## PROBLEM

Mapping a global legal market required stitching fragmented datasets across multiple tools.

**Francesca Pavan**

Director of Demand  
Generation  
Legora

## SOLUTION

Aggregate law firms and corporate legal teams globally

Classify firms by archetype, size, and headquarters

Segment accounts by ICP fit for targeted campaigns

Push enriched TAM lists into Salesforce CRM

## IMPACT

**80-90%**

contact match rate

**50%**

lift in qualified leads from  
Clay-sourced campaigns

**LEGORA**

## PROBLEM

Event registrants matching ICP couldn't be acted on without enrichment or automated scoring.

**Sharon Roessen**

Chief Operating Officer  
Terrapinn

## SOLUTION

Enrich registrants with firmographic and signal data

Score registrants against sponsor ICP criteria

Surface sponsor-fit context per registrant company

Create follow-up tasks in Gong for reps

## IMPACT

**90%**

reduction in prospect acquisition cost

**+19%**

revenue per rep across 150 sales reps

**Same day**

new registrations enriched and in Salesforce

SPARK SOMETHING  
**TERRAPINN** 

## PROBLEM

Massive inbound lead volume overwhelmed a small sales team lacking scoring capacity.

**Adam Wall**

Head of Sales  
Operations  
Anthropic

## SOLUTION

Enrich inbound leads across  
150+ data providers

Claude AI generates  
custom industry and  
segmentation fields

Score each lead using  
tailored classification  
signals

Push scored leads into  
Salesforce sales pipeline

## IMPACT

**3x**

data enrichment coverage

**10+ hours**

saved weekly automating  
inbound lead scoring

**25+**

custom industry categories  
for scoring

**ANTHROPIC**

## PROBLEM

Manual verification of wholesale e-commerce registrations created daily bottlenecks for the sales team.

**Andrew Thomas**

Director of Marketing  
Regency Supply

## SOLUTION

Webhook captures  
wholesale registration  
emails automatically

AI scores leads on business  
type and legitimacy

Qualified leads matched to  
appropriate sales reps

Route verified leads to reps  
in CRM

## IMPACT

**100%**

of manual qualification  
process fully automated

**10 h/mo**

of rep time saved

**REGENCY**SUPPLY

## PROBLEM

Manually identifying ICP-fit accounts caused misaligned targeting and wasted effort.

**JJ Tang**

Co-founder and CEO  
Rootly

## SOLUTION

Claygent scans LinkedIn, job postings, tech stacks

Three-tier scoring classifies each account

High-fit accounts receive tailored outreach priority

Route scored leads into outbound workflows

## IMPACT

**100%**

automation of outbound workflows

**10x**

outbound volume

## PROBLEM

A small team cannot manually prospect and personalize outreach across millions of companies.

**Pedro Azevedo**

Marketing and Growth  
Operations leader  
Coverflex

## SOLUTION

Enrich 1M+ prospects from  
3M+ company database

Route qualified leads by  
signal and criteria

Generate custom landing  
pages, emails, and assets

Push sequences to Lemlist  
and HubSpot

## IMPACT

**200+**

additional demos generated  
per month

**5x**

team output capacity  
increase

**1M+**

prospects enriched in  
database

## PROBLEM

Manual intent-based outbound process left lower priority accounts unreached and pipeline untapped.

**Petra Hajal**

Marketing Operations  
Oyster

## SOLUTION

Aggregate intent signals  
from G2 and web sources

Score and route accounts  
by intent strength

Tailor messaging to each  
account's buying stage

Push enriched accounts to  
sales sequences via CRM

## IMPACT

**40 hrs**

saved monthly per sales rep

**4x**

increase in accounts reached  
via intent outbound

**Oyster**

## PROBLEM

Generic outbound fails to break-through with technical buyers.

**Stuart Lundberg**

Head of Operations  
Pump

## SOLUTION

Enrich accounts with  
technographic and hiring  
signals

Classify prospects by tech  
stack and growth stage

Generate personalized  
messaging citing tech stack

Send personalized  
outbound emails to  
prospects

## IMPACT

**30%**

improvement in outbound  
lead-to-meeting conversion

**25%**

response rate increase

## PROBLEM

Manual address research caused misdirected direct mail, wasting budget across multi-site European accounts.

**Cody Leovic**

Senior Growth Manager,  
EMEA  
Verkada

## SOLUTION

Pull LinkedIn URLs, run Google Business lookups

Cross-reference LinkedIn location with office addresses

Select gifts based on prospect interests

Push enriched contacts to Salesforce for outreach

## IMPACT

**95%**

address data accuracy

**2x**

direct mail pipeline-to-cost ratio improvement

**£80K**

annual savings

**Verkada**

## PROBLEM

Manual campaign creation limited outbound to one campaign per quarter.

**Evan Rosenstein**

Head of Growth  
Recharge

## SOLUTION

Pull behavioral signals from Snowflake, CRM, enrichment

Segment audiences by usage, GMV, and engagement

Revenue-specific messaging generated per prospect

Flow sequences into Outreach

## IMPACT

**+20%**

increase in opportunity conversion rates

**+12%**

lift in outbound conversion rate

**8x**

increase in campaign volume

**recharge**

## PROBLEM

SDRs manually tracked funding events across scattered tools, slowing outbound outreach.

**Darri Atlason**

Head of Growth  
Harmonic

## SOLUTION

Track funding events via API  
in real time

Identify co-investors and  
funding details

Tailor messages citing  
relevant context

Send personalized outreach  
via SalesLoft

## IMPACT

**2x**

SDR outbound capacity

**3x**

response rate

**50 h/mo**

manual work eliminated

**Harmonic**

## PROBLEM

Closed-lost deals sat dormant because manual re-engagement could not scale.

**Austin Sandmeyer**

Head of Growth Marketing  
Sendoso

## SOLUTION

Import closed-lost opportunities and stalled leads from CRM

Summarize deal history from CRM notes and call transcripts

Generate emails referencing prior interest and talking points

Send automated sequences via Instantly

## IMPACT

**16**

meetings booked within two weeks

**75%**

open rate on re-engagement emails

**Sendoso**

## PROBLEM

Sales reps using multiple disjointed tools led to uncoordinated and unscalable outreach.

**JJ Tang**

Co-founder and CEO  
Rootly

## SOLUTION

Enrich contacts via 150+ providers and LinkedIn

Score leads into three-tier qualification tiers

Tailor emails using role, industry, and pain points

Send personalized email and LinkedIn campaigns

## IMPACT

**3**

tools consolidated into one workflow in Clay

**10x**

outbound volume

## PROBLEM

Manual data prep consumed days, preventing reps from focusing on productive conversations with prospects.

**Alexander DeMoulin**

Director of GTM Ops  
Intercom

## SOLUTION

Enrich 21,000 contacts via  
150+ providers

Score accounts by ICP-fit  
signals automatically

Surface per-account  
qualification reasons for  
reps

Push enriched lists into  
Salesforce for reps

## IMPACT

**140%**

growth in outbound-sourced  
pipeline

**Minutes**

to build prospecting list

**21,000**

contacts enriched in a single  
month

**INTERCOM**

## PROBLEM

Personalizing hundreds of thousands of cold emails monthly required manual data work that could not scale.

**Davison Chung**

Growth Lead  
Rippling

## SOLUTION

Import leads into Clay tables for enrichment

Segment leads by persona and company size

Generate 12+ tailored email variants per segment

Push personalized sequences into Outreach

## IMPACT

**2x**

year-over-year cold email performance improvement

**12+**

targeted email variants driving higher engagement

**100,000s**

personalized emails sent per month

**}} RIPPLING**

# Clay for **Inbound**

## PROBLEM

A single data provider left massive gaps when enriching high-volume of inbound leads.

**Adam Wall**

Head of Sales  
Operations  
Anthropic

## SOLUTION

Waterfall-enrich inbound leads

Deduplicate and standardize firmographic fields automatically

Append emails, phone, domain, size, funding per lead

Push fully enriched records into Salesforce

## IMPACT

**3x**

improvement in data enrichment coverage

**150+**

data providers accessed through Clay

**ANTHROPIC**

## PROBLEM

Manual inbound lead processing delayed follow-ups and led to missed opportunities.

**Darri Atlason**

Head of Growth  
Harmonic

## SOLUTION

Form submissions  
auto-enriched with contact  
details

Leads routed to sales rep by  
territory

Personalized messages  
crafted from enriched data

Reps follow up via  
automated outreach  
sequences

## IMPACT

**50 h/mo**  
manual work eliminated

**3x**  
response rate improvement

**2x**  
SDR outbound capacity  
increase

## PROBLEM

Single-provider inbound enrichment left huge coverage gaps amid surging enterprise demand.

**Keith Jones**

GTM Systems Lead  
OpenAI

## SOLUTION

Waterfall queries 150+ providers per inbound lead

Score and route leads using enriched data

Complete lead profiles enable tailored rep response

Push enriched, scored leads into Salesforce

## IMPACT

**2x**

inbound lead enrichment coverage vs. previous vendor

**80%+**

inbound enrichment coverage

**< 2 weeks**

to refine provider combination and ordering

**OpenAI**

## PROBLEM

Sales reps lacked real-time product usage signals to prioritize expansion conversations.

**Joel Davidson**

VP of Revenue  
Operations  
Mistral AI

## SOLUTION

Pull usage data from  
BigQuery and invoicing

Route consumption signals  
and threshold alerts to reps

Surface account-specific  
signals and expansion  
trends

Push enriched consumption  
records into Salesforce

## IMPACT

**6 weeks**

to build and deploy vs. 6  
months with traditional ETL

**\$500K**

saved on data integration  
consultants and platforms

**Mistral AI**

## PROBLEM

PLG signups use personal emails, hiding high-value company accounts from the sales team.

**Adam Wall**

Head of Sales  
Operations  
Anthropic

## SOLUTION

Ingest PLG signups from API, Bedrock, Vertex

Waterfall data providers to resolve work emails

Enrich company domain, size, and funding round

Push enriched records into Salesforce

## IMPACT

**150+**

data providers accessed via waterfall enrichment

**3**

PLG signup channels enriched automatically

**ANTHROPIC**

## PROBLEM

Product-led growth stalled when teams relied solely on engaged leads to convert.

**Evan Rosenstein**

Head of Growth  
Recharge

## SOLUTION

Pull product usage and GMV signals from Snowflake

Flag accounts crossing \$50K+ GMV and engagement thresholds

Generate revenue-impact messaging using each prospect's data

Push targeted sequences into Outreach

## IMPACT

**10x**

improvement in call conversion rates

**8x**

increase in simultaneous PLG campaigns run

**20,000+**

merchants in addressable product usage base

**recharge**

# Clay for **Rep Productivity**

## PROBLEM

Manual tracking of funding, hiring, and compliance signals cannot scale across accounts.

**Mark Lail**

Director of Revenue  
Operations  
Vanta

## SOLUTION

Monitor RSS feeds, job boards, and compliance sites

Auto-create signal records and route to reps

Enrich signals with company context and key insights

Push prioritized alerts and tasks into Salesforce

## IMPACT

**100%**

automated research tasks across all sales reps

**4**

distinct signal types tracked in real time

**80%+**

enrichment coverage on signal-triggered accounts

**Vanta**

## PROBLEM

Fragmented tools cannot track buying signals across millions of companies at scale.

**Pedro Azevedo**

Marketing and Growth  
Operations leader  
Coverflex

## SOLUTION

Scans ICP companies  
monthly for buying signals

Filters accounts by signal  
strength to prioritize  
outreach

Enriches decision-maker  
profiles with contact and  
activity data

Pushes signal-qualified  
leads into HubSpot for sales

## IMPACT

**3M+**

companies scanned for  
buying signals

**5x**

rep output capacity increase

**200+**

demos per month generated

## PROBLEM

Dormant accounts lacked timely buying signals needed for relevant re-engagement.

**Petra Hajal**

Marketing Operations  
Oyster

## SOLUTION

Track hiring and growth signals across dormant accounts

Score dormant accounts by ICP fit and activity

Tailor outreach citing detected trigger and new contacts

Route enriched leads to BDRs via email

## IMPACT

**40 hrs**

monthly saved per sales rep

**4x**

increase in accounts reached

**Oyster**

## PROBLEM

European privacy laws made third-party intent signals ineffective for lead reengagement.

**Cody Leovic**

Senior Growth Manager,  
EMEA  
Verkada

## SOLUTION

AI mines emails, Gong transcripts, and product usage

Categorize buying signals and route to campaigns

Tailor reengagement using deal-specific competitor intelligence

Push enriched signals into Salesforce campaigns

## IMPACT

**100%**

lift in outbound reply rate

**10 years**

of first-party data unlocked for GTM signal mining

**Verkada**

## PROBLEM

A lean sales team cannot manually monitor 1,500+ enterprise accounts for timely engagement signals.

**Tim Bourcier**

RevOps, Marketing Lead  
Merge

## SOLUTION

AI scans 1,500 enterprise accounts weekly for signals

Flags product launches, partnerships, and org changes

Drafts tailored outreach mapped to integration category

Surfaces alerts with drafted messages to account owners

## IMPACT

**+15%**

enterprise meetings booked

**1,500+**

enterprise accounts scanned weekly

**20%**

better response rates on enriched accounts

 **MERGE**

## PROBLEM

High-intent website visitors weren't able to be identified and engaged by assigned rep.

**Bryanna Clancy**

Marketing Ops & GTM  
Engineering Leader  
Hex

## SOLUTION

Monitor high-intent pages  
and enrich ICP visitors

Match visitors to assigned  
reps and SDRs

Engagement summary  
listing use cases and  
contact info

Fire Slack notifications  
tagging assigned reps

## IMPACT

**+50%**

lift in win-rates for  
signal-identified accounts

**Three**

high-intent page types  
monitored

**HEX**

## PROBLEM

Fragmented data across eight siloed systems prevented proactive lifecycle event detection.

**Evan Rosenstein**

Head of Growth  
Recharge

## SOLUTION

Unify 8 sources: Snowflake, CRM, behavioral, enrichment

Flag acquisition, expansion, and churn lifecycle events

Segment by GMV thresholds and engagement signals

Trigger proactive outreach via Outreach sequences

## IMPACT

**8**

data systems unified into a single orchestration layer

**3**

lifecycle stages automated

**10x**

call conversion rate increase

**recharge**

## PROBLEM

Job changes among former customers go undetected, leaving warm re-engagement opportunities untapped.

**Austin Sandmeyer**

Head of Growth Marketing  
Sendoso

## SOLUTION

Detect job changes across former contacts

Triggers Clay workflow to enrich updated profiles

Drafted congratulations emails with tailored gifts

Send personalized outreach emails automatically

## IMPACT

**+20%**

higher response rates

**3x**

more prospects engaged

**\$1M+**

pipeline generated during pilot

**Sendoso**

## PROBLEM

Manual processes cannot capitalize on real-time incident signals fast enough for timely outreach.

**JJ Tang**

Co-founder and CEO  
Rootly

## SOLUTION

Monitor incident signals via integrated monitoring tool

Route incidents through Clay workflows

Enrich contacts and tailor messages per incident

Send personalized emails to decision-makers within minutes

## IMPACT

**< 5 mins**

response time from signals

**100%**

automation of outbound workflows

**3**

tools consolidated into Clay

 **rootly *ai***

## PROBLEM

Reps lacked actionable intent signals to prioritize high-value accounts confidently at scale.

**Fredrika Hillström**

GTM Operations Manager  
Sana

## SOLUTION

Enrich 30,000 accounts with custom intent signals

Layer signals atop firmographics to route per rep

Surface account-specific triggers like job changes to reps

Deliver actionable alerts directly to assigned reps

## IMPACT

**30,000**

accounts enriched with custom signals

**140**

sales reps receiving actionable intent signals directly

**Sana**<sup>TM</sup>

## PROBLEM

No enrichment provider captures non-standard prospect affinities, making manual signal discovery unscalable.

**Francesca Pavan**

Director of Demand  
Generation  
Legora

## SOLUTION

AI researches contacts for unique signals

Filter and confirm  
ICP-aligned prospects with  
golf affinity

Craft campaign messaging  
around shared golf interest

Launch targeted campaign  
to 6,000 matched prospects

## IMPACT

**+60%**

increase in qualified leads  
from Clay-sourced  
campaigns

**70%**

faster campaign launches  
since adopting Clay

**LEGORA**

## PROBLEM

Manual account research took reps hours, delaying follow-up by days.

**Mark Lail**

Director of Revenue Operations  
Vanta

## SOLUTION

AI scans websites for SOC 2 and compliance signals

Trigger research when rep claims Salesforce account

Summarize compliance posture and competitive landscape per account

Deliver research summaries directly into Salesforce

## IMPACT

**Same day**  
automated call follow-up

**100%**  
of manual research tasks automated across all sales reps

**Automatic**  
account research for reps

**Vanta**

## PROBLEM

Manual follow up on no-show prospects consumed 20 minutes per lead and could not scale.

**Stuart Lundberg**

Head of Operations  
Pump

## SOLUTION

Enrich no-show leads with company and hiring data

Score leads by growth signals and prioritize outreach

Generate tailored emails citing timely reconsideration reasons

Send follow-up emails and push prioritized BDR call lists

## IMPACT

**26%**

no-show recovery rate

**0 min**

marginal time investment per lead for no-show recovery

# Clay for **Marketing**

## PROBLEM

Scattered buying signals across separate tools overwhelmed reps instead of enabling prioritization.

**Bryanna Clancy**

Marketing Ops & GTM  
Engineering Leader  
Hex

## SOLUTION

Track social, fundraising, hiring, and alumni signals

Score accounts by propensity to buy centrally

Combine Clay signals with campaign engagement per account

Feed scored accounts into Hex-native ABM application

## IMPACT

**3**

GTM data vendors consolidated into Clay

**4**

distinct buying signal types tracked automatically

**Centralized**

source of truth within Clay

## PROBLEM

Niche audience targeting required manual research that could not scale across channels.

**Davide Grieco**

Head of Growth  
Verkada

## SOLUTION

Scrape HOA directories across all 50 states

Match prospects to LinkedIn profiles and classify ICP skills

Tailor ads, landing pages, and mail per prospect signals

Upload enriched audiences to LinkedIn Ads

## IMPACT

**2x**

increase in LinkedIn ad targeting match rates

**600+**

personalized landing pages auto-generated per campaign

**Verkada**

## PROBLEM

Manual research delivered shallow competitive intel data too slowly for reps to act on.

**Arthur Lorente**

Director of GTM Operations  
A-LIGN

## SOLUTION

AI researches 2,000 accounts for 15 services

Map competitor presence and service justification per account

Surface specific competitor and need context per rep

Push displacement insights live into Salesforce

## IMPACT

**83%**

reduction in competitive research costs

**15x**

more data points than manual research

**\$6.8M**

pipeline generated from competitive displacement

**A-LIGN**

## PROBLEM

Native LinkedIn filters cannot reach niche audiences, leaving half of prospects unmatched.

**Davide Grieco**

Head of Growth  
Verkada

## SOLUTION

Ingest prospect name and email lists into Clay

Match each prospect to their LinkedIn profile

Identify unique ICP skills patterns per prospect

Sync matched audiences to LinkedIn Ads

## IMPACT

**2x**

increase in LinkedIn ad targeting match rates

**~100%**

match rate up from prior 50%

**Verkada**

## PROBLEM

No geographic data to target the right audience for in-person events.

**Dan Murphy**

COO

Exit Five

## SOLUTION

Enrich 27K contacts with geographic location data

Identify audience clusters by region automatically

Target local subscribers for regional event invitations

Push targeted lists to HubSpot for outreach

## IMPACT

**27,000**

contacts enriched with geographic data

**100%**

automation of geographic event targeting

**50%**

of database enriched with actionable firmographic data

**exit five**

## PROBLEM

One-person events team cannot source, brief, and capture leads at scale.

**Tim Bourcier**

RevOps, Marketing Lead  
Merge

## SOLUTION

Agent scrapes event platforms for upcoming opportunities

Scores events by location, speakers, audience fit

Briefs reps with attendee roles and relevant solutions

Enriches Slack-captured leads, pushes to Salesforce

## IMPACT

**2x → 5x**  
improvement in  
cost-to-pipeline ratio

**+50%**  
event-sourced deals

**25%**  
of quarterly pipeline  
generated from events

 **MERGE**

## PROBLEM

Manually identifying and engaging relevant event prospects didn't scale.

**Arthur Lorente**

Director of GTM Operations  
A-LIGN

## SOLUTION

Enrich event prospect lists  
via LinkedIn profiles

Match enriched profiles to  
target ICP criteria

Tailor outreach using  
LinkedIn role and event  
context

Push personalized  
sequences to outreach  
platform

## IMPACT

**\$9M**

pipeline influenced through  
event targeting

**A-LIGN**
